

NEWPORT

SHANGHAI

QUALITY ASSURANCE

Newport Shanghai

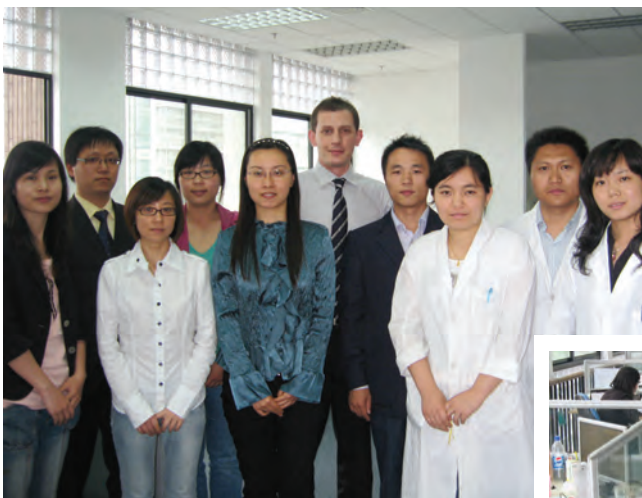

Newport Shanghai was established in 1998, 100% owned and managed by the Newport Group which specialises in Supply Chain Management for chemicals.

With working relationships with over 90 Chinese Mainland factories, and access to over 15,000 products and several hundred factories, Newport Shanghai is one of the fastest growing Foreign Invested companies.

Supporting the sourcing, logistical and quality aspects for Group companies in Europe, United States and Eastern Europe.

China Team

Newport Shanghai is led by our European Manager, with a team of 8 chemists and administrative staff. Located in the Zhanjiang Hi-Tech park in Shanghai, an area specifically developed for Chemical Industry for R&D and production. The location is 30 minutes from Pudong Airport, giving us convenient air access to the rest of China.

Continuous professional development of our staff ensures our work practices and ethics are to Western Standards, with focus on quality control and continuity of supply.

Laboratories

Our Laboratory is central to our quality control systems.

Tens of thousands of organisations export chemicals from China, without pre-shipment sampling, relying on the manufacturers laboratories to produce certificates of analysis.

We are Different.....

Our Supply-Chain systems focus on :-

1. Test methods used by the Chinese Factory and tests methods used by our Eu / USA clients.
2. Test equipment used by factories verses our own laboratories
3. Actual results compared to certificate of analysis
4. Batch to Batch variability

We are able to conduct most tests within our own resources, and have access to GPC / XRF / Atomic Absorption.

Samples are retained for 2 years for every batch exported.

Our Chemists audit all factories, for Raw material feed stocks, quality control systems, batch process, environmental and laboratory procedures. More importantly, we audit the Management.

Commercial and Legal

Newport Shanghai retains legal advisors within China, producing commercial contracts in Chinese and English languages. This enables us to comply within Chinese Jurisdiction, and gives us the added advantage of legal resolutions if products need to be returned.

Re-packing Operations

The quality of packaging, and special requirements requested by our clients, led us to establish a Re-Packing operation in Shanghai. We are able to pack chemicals into nearly every conceivable type and size.

*With over 200 clients in over 30 countries.....
you'll be in good company.....*
